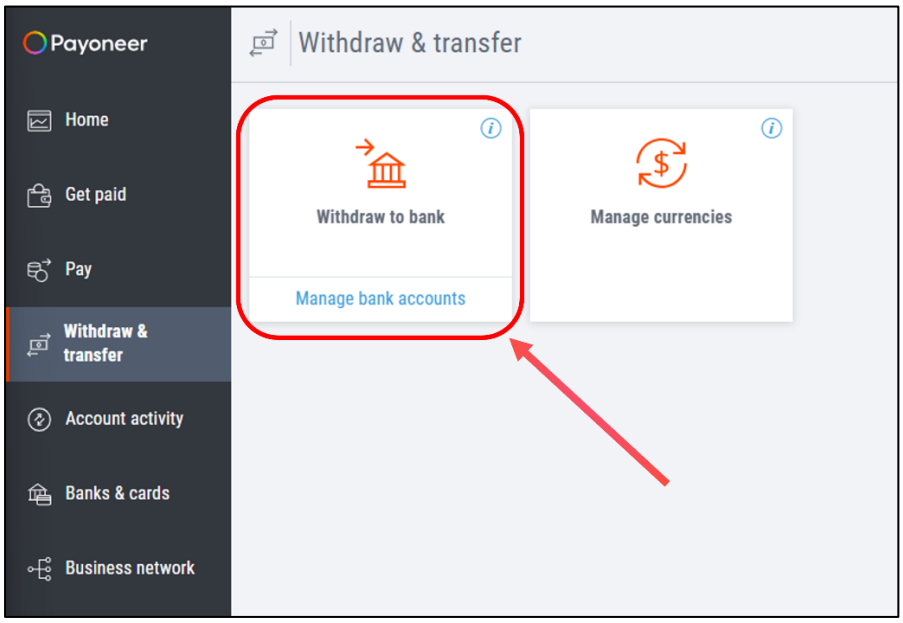
How to withdraw funds from your Payoneer Account and deposit them in your bank account

Effortlessly withdraw funds from your Payoneer Account and deposit them directly into your bank account. This makes accessing your funds in local currency quick, easy, and affordable, just about wherever you are in the world.

To withdraw funds to your bank account:

1. Sign in to your Payoneer Account, go to the **Withdraw & transfer** tab, and then click **Withdraw to bank**.



2. In the **Withdrawal details** screen, fill in the information about the withdrawal you want to make:

    a. Select the balance from which you want to withdraw in the **From** dropdown and select the bank account to which you want to transfer the funds in the **To** dropdown.

    Your available balance is displayed underneath the **From** field.

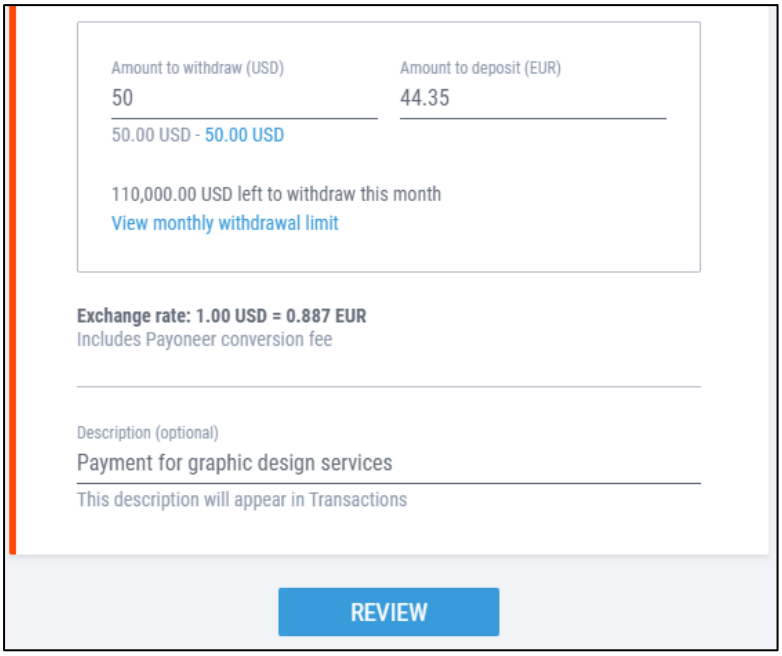
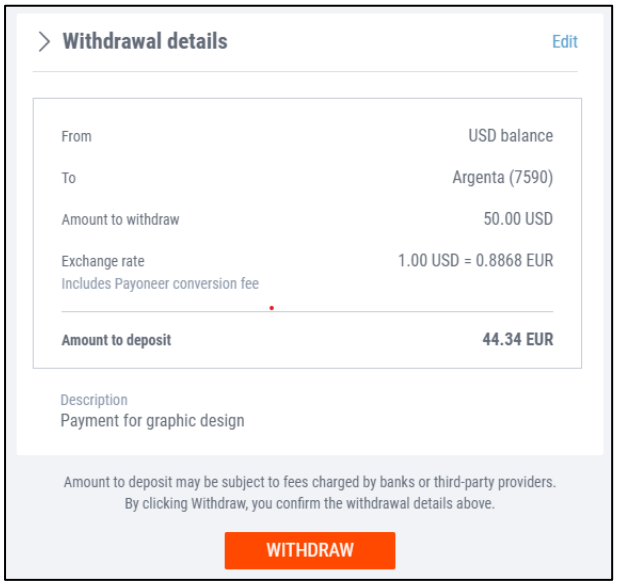
b. In the **Amount to withdraw** field, enter the amount you want to withdraw. The **Amount to deposit** field displays the equivalent (based on exchange rates) of the amount you want to withdraw in the local currency of the bank account to which you are depositing the funds, including Payoneer's conversion fee.



(It is recommended to add a short and clear description of the withdrawal in the **Description (optional)** field.)

Click **REVIEW** to proceed.

3. Review the details of the withdrawal. (If you need to change any of the details, click **Edit**.)



Once you have verified that the details of the withdrawal are correct, click **WITHDRAW**.
